ENTRY POINT

When the client needs recovery, not just service. Your clients are used to a high level of service — but at some point the request goes beyond the familiar format of rest. They need an environment where recovery is handled systemically and confidentially, at the level they expect.

Personally. Systemically. Confidentially.

When the client needs recovery, not just service

Your clients are used to a high level of service. But at some point the request moves beyond the usual format of rest and recovery.

The person keeps functioning, yet:

- Loses energy
- Lives in chronic tension
- Does not recover after surgery
- Cannot cope with the load
- Wants to "come back to themselves" but is not ready to go to a clinic

They need an environment where recovery is handled systemically and confidentially — at the level they are used to.

A private medical residence on the Adriatic coast

Garden Recovery is a closed residence for the systemic recovery of physical and psycho-emotional states.

Our task is to help guests stabilize, restore their resource and return to life with greater resilience and a stronger inner foundation.

We bring together:

- Medicine
- Psychological support
- Physiotherapy
- Personalized nutrition
- A controlled recovery environment

It is a space where recovery becomes part of one's way of life.

Requests that are hard to name, yet impossible to ignore

People come to us when they:

- Live at an intense pace
- Are recovering after surgery or a heavy medication load
- Face emotional exhaustion complicated by substance overuse
- Want to restore sleep, concentration and inner resource
- Value privacy and an individual approach

Garden Recovery sustains the level of service the premium-segment client is accustomed to.

A systemic approach to recovery

We take on the entire process:

- Medical diagnostics
- A personal recovery protocol
- Daily accompaniment by specialists
- Psychological support
- Individual nutrition
- Monitoring of the state's dynamics
- Accompaniment after the program is completed

The client gains access to a program that delivers a high-level result.

Recovery as a managed process

01 Consultation

We capture the initial state and the request, and set the direction of recovery.

02 Diagnostics

We study how the body works as a single system and identify the causes behind changes in the state.

03 Protocol

We build a personal recovery program based on the diagnostic results and track the dynamics of the state.

04 Intensive

We create the conditions for a deep reset of the body and the restoration of physical strength and emotional resource under specialist supervision.

05 Stabilization

We assess and consolidate the result and build a strategy for preserving progress after the program.

Executive Recovery

CHRONIC STRESS & OVERLOAD

Recovery after chronic stress, emotional burnout and high loads.

Body Balance Reset

METABOLISM & SELF-REGULATION

Work with metabolic balance, eating behavior and the restoration of the body's internal processes.

Post-Surgery Recovery

POST-OPERATIVE REHABILITATION

Recovery after surgical interventions and a heavy medication load.

Human Reserve

SUSTAINING RESOURCE

Preventive support of resource under high intellectual, emotional and physical loads.

The space shapes the state

Garden Recovery is located in the Sveti Stefan area, Montenegro.

A quiet, private atmosphere, the sea, the climate and the absence of outside pressure all become part of the recovery process.

We create a space where a person can stop, restore their resource and regain control over their state.

The level of trust your clients expect

A program is formed only after a doctor's consultation and is built on the principles of evidence-based medicine.

We observe strict standards of confidentiality and ensure a personal approach at every stage of interaction.

For many of our guests, privacy is not an additional service but an essential condition for recovery.

Simple integration into your ecosystem of services

Garden Recovery can become an additional solution for clients who need a deeper level of recovery.

We offer:

- A clear recovery process
- Prompt communication
- A high level of service
- An individual approach to each client
- Discreet accompaniment at every stage

We strengthen the value of your offering while preserving the client's trust in you.

When care for the client goes beyond service

There are requests that cannot be solved by booking a hotel, a holiday or a massage session.

Garden Recovery creates an environment where a person can restore their physical and emotional resource under specialist supervision.
