

MEDICAL RESIDENCE

Garden Recovery

PRIVATE MEDICAL RESIDENCE · ADRIATIC COAST

A professional response to delicate matters in the psycho-emotional sphere. Work with states that are hard to name yet impossible to ignore. An environment where a person who has lost their footing rediscovers inner order, clarity, dignity, a taste for life and self-respect.

We are a stop along the way — a place where recovery becomes part of life.

For those who

- work at a constant, high intensity
- want to build healthy eating habits
- need rehabilitation support after aesthetic procedures
- take a systemic approach to their quality of life
- value trust, confidentiality and an individual approach

THE PROCESS

The guest's path

Recovery is a managed process, and we take its guidance upon ourselves. Our guests go through a program to learn again how to regulate their state.

-
- 01 Consultation** We record the initial state and request, and set the direction of recovery.
 - 02 Diagnostics** We study the body as a single system and identify the causes of changes in the state.
 - 03 Protocol** We build a personal recovery program based on the diagnostics and track the dynamics.
 - 04 Intensive** We create conditions for a deep reset of the body, restoring physical strength and emotional resource under specialist supervision.
 - 05 Stabilization** We assess, consolidate the result and build a strategy to preserve progress after the program.
-

INCLUDED

What the programs include

- Single luxury suite with a sea view
- Three meals a day from the chef, to an individual plan
- Medical diagnostics
- Personal recovery plan
- Daily supervision by a doctor
- Nutritionist consultations
- Infusion therapy
- Physiotherapy: massage, exercise therapy
- Psychotherapy sessions
- Pharmacological support

Four directions

Executive Recovery

BURNOUT & OVERLOAD

Recovery after chronic stress, emotional burnout and high loads. Aimed at stabilizing the nervous system and restoring energy, focus, sleep and overall resource.

Body Balance Reset

METABOLISM & SELF-REGULATION

Gentle restoration of metabolic balance and eating behavior. Helps lower stress, restore energy exchange and support the nervous system.

Post-Surgery Recovery

POST-OPERATIVE REHABILITATION

Recovery after surgery and medication load. Speeds up regeneration, reduces swelling, restores energy and a safe return to activity.

Human Reserve

SUSTAINING RESOURCE

A preventive program to maintain energy, immunity and resilience under high physical and intellectual loads.
